## 30 years of Wibu-Systems

1989-2019: A new milestone on Wibu-Systems' path towards embracing its role as the fully dedicated global leader in secure license management.

Over the last three decades, the company has kept true to its identity by leveraging business, technology, and team continuity. They have built and shaped a network of channel partners that have been with them for the entire journey and that their international customers have come to trust as their local centers of excellence.

While they maintain their commitment to supporting their legacy technology, which is still available and continually updated even after 30 years, they also offer smooth migration options to their latest groundbreaking innovations.

They have been cultivating a professional, inspired, and cohesive team that continues to excel at delivering cutting edge services and guiding their customers year after year in bringing their protection, licensing, and security projects to fruition.
